Easy Peezy!

Every now and then you come across a great product and you just know it was invented by a mum...that's certainly the case with Qubies! Qubies is an upside down ice cube container specifically designed to store and freeze baby puree into convenient meal sized cubes...but it's not like any other ordinary ice

cube tray. The dividers are actually on the lid rather than the base of the tray. This is a brilliant idea! It means you simply fill the tray, snap on the lid and freeze. No mess, no fuss. Immediately the food is divided into functional 30ml baby portions and because the lid and dividers are made from non stick silicon, it means the cubes are easy to remove – it doesn't get much easier than that! RRP \$16.95 Available at Baby Dreamland, Maroochydore, or online from www.Qubies.com.au and www.miinkimooop.com.au

COOL KID'S CLUBS!

PLUS Great school holiday recipes, family movie passes to give away and heaps more!
