Qubies!

Milkshakes and smoothies are a regular healthy snack in our household. Firstly because they are so delicious and the girls adore them and secondly because (thanks to Qubies) I always have the ingredients on hand! There is almost nothing better than a refreshing drink which takes little to no effort in making.

I always have milk and a scoop of ice-cream on hand (what Mum doesn't?!). However I don't always have fruit on hand (we go through it so quickly)... or I should say, 'I didn't' used to have fruit on hand. Now I do. Recently Qubies sent me one of their amazing freezable storage containers to try out.

Qubies freezable storage containers are perfect for storing breast-milk, sauces, pureed baby foods or mini desserts... the list is endless. I have been pureeing my fruit and freezing them in my new container and simply popping out one cube for each smoothie I make! Too easy! AND... they are dishwasher safe (a must in my opinion!).

the imperfect housewife

in my opinion!).

They come in many funky colours... don't you just love the pink?!

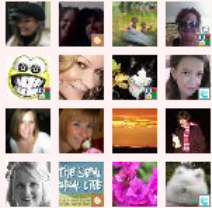

I'm impressed with the quality of the product. I don't feel like I need to be careful with them, just in case they might break. I'm looking forward to adding to my Qubies collection when my bubs arrives... no more storing breast-milk in zip-lock storage bags! [Pin it](#)
