Qubies a perfect solution

IT took a slightly desperate but very clever mum to create Qubies.

Alex Wardle found conventional ice-cube trays just didn't cut the mustard when she tried to store her baby's food or breast milk in them.

Her frustration led to the birth of her next "baby", Qubies.

A little like an upside down ice-cube tray, Qubies works by having the dividers in the silicone lid rather than the base. Simply give

the container a twist to free the cubes.

Available from www.qubies.com.au and at selected baby stores for \$19.95 each.
