## Qubies Review

by Nicole

### The simple way to freeze and store breast milk and baby food

I love my Qubies - they are the best way to freeze anything from Breast milk to food. How hard is it to fill an ice cube tray with baby food only to spill it all over the place. With Qubies you don't have to worry. Pour it straight in then snap the lid on and will freeze in portions for you. Qubies is the one thing that I could not live with out in my house a must for any mum.
